YOU

Infrastructure as data?

Nah!
Infra-
structure
as
code!

```
$vhosts = hiera('apache_virtual_hosts')
$vhosts.each { |$vh|
  include apache
  if $vh['special'] { ... }
  apache::vhost { $vh:
    ...
  }
}
```

puppet

MASTER

IF THIS IS A RESOURCE

```
file { '/etc/ntp.conf':  
  owner => 'root',  
  mode  => '0644',  
  content => "# This file is empty\n",  
}
```

HOW CAN I PARSE IT?

```
BODY=$( sed -n '/file {/,/}/p' $MANIFEST \  
| sed '1s/.*{/' )
```

```
TYPE=$( head -n1 $MANIFEST \  
| cut -d\{ -f1 \  
| tr -d ' ' )  
MODE=$( echo $BODY | grep mode \  
| cut -d\> -f2 | tr -d ' ,' )
```

TOKENIZE

```
file { '/etc/ntp.conf':  
  owner => 'root',  
  mode  => '0644',  
  content => "# This file is empty\n",  
}
```

```
file { /etc/ntp.conf : owner  
=> root , mode => 0644 ,  
content => # This file is empty\n }
```
